Certified UL 508A Industrial Control Panels

Estabrook creates value for our customers in equipment manufacturing and automation processes. We have comprehensive engineering and production know-how as well as expertise in total system solutions and control technology. We can provide complete service in the construction of custom control panels that can be built to UL 508A standard

THE UL 508A SPECIFICATION PROCESS:

We help our customers expand their production capacity and sales potential by providing the ability to quickly connect a quality finished panel. As our customer, if you request a UL 508A compliant panel, you would receive a high quality control panel that complies with international standards. All electrical, electronic and mechanical configuration and installation work (assembling, wiring, soldering, inspecting, etc.) is done in our Estabrook facility located in Berea, Ohio.

CONTACT US TO DISCUSS YOUR CONTROL PANEL NEEDS:

For more information, or if you wish to purchase a UL 508A compliant panel, please contact your Estabrook sales engineer for details. Call us at [800-959-9161](tel:800-959-9161).
