

Trade-in Program

the best program of its kind ever offered, take advantage and take 20% off

Overview

Trade in your old pump, macerator or grinder and receive an additional discount of up to 20% on a new, state-of-the-art NETZSCH pump! This is valid for any of our competitors of Progressing Cavity, Rotary Lobe, Multiple Screw or Hose Pumps as well as macerators and grinders.

The Program

- Identify your pump/grinder, from any manufacturer of Progressing Cavity, Rotary Lobe, Multiple Screw, or Peristaltic Pumps or macerators/grinders that could be replaced by a NETZSCH machine.
- Collect and provide all details from the pump/grinder to be replaced e.g. application data, name plate, drawing, etc. Ideally, a NETZSCH Regional Manager should visit the location before the offer is made. Our team needs to validate the trade-in and then prepare an offer.
- NETZSCH will also accept a trade-in of one technology to receive a different technology. For example: You can exchange a competitor's progressing cavity pump to receive a NETZSCH TORNADO® Rotary Lobe Pump.
- Ship the trade-in pump/grinder to the nearest NETZSCH location

(Exton, PA or Houston, TX) in accordance to our Return of Goods (RGA) guidelines.

- The pump, macerator or grinder must be clean before shipping to NETZSCH.

There're more benefits

- You may have competitor parts in stock which is keeping you from making a switch, therefore NETZSCH will also consider replacing, like-for-like, new, unused competitor spare parts on your shelf for the Trade-in pump/grinder. There are limits on parts quantities.

Freight

- You pay the freight to ship the old, competitor pump/parts to the nearest NETZSCH (Houston or Exton) location.

- NETZSCH pays the freight for the new NETZSCH pump (and parts) to you, the end user. NETZSCH reserves the right to choose the freight method.
- This program is only valid in contiguous, lower 48 states of the USA.

Validity

- Special configuration pumps, high alloy steel, API 676, pumps with custom documentation required, etc. are not included in this program.
- Trade-in pumps are limited to three (3) units per end-user.
- Other rules, limitations, and conditions apply. Please ask your NETZSCH Distributor or NETZSCH Sales Representative for details.

To take advantage of this Trade-In Incentive, please contact us at 800-959-9161, and a Sales Associate will get back to you soon!
