INDUSTRIAL PUMPS

Centrifugal • ANSI • Slurry • Sump
 • Submersible • Split Case
 • Vertical Turbine
 • Mag-Drive • Energy Process

Ceramic, Alloy & Non-Metallic
 Chemical Pumps

Process Control &
 Pump Protection

Manufacturer of OEM
 & Obsolete Pump Parts

Regenerative Turbine

Air-Operated Diaphragm

Axial Flow • Mixed Flow

Mag Drive • Drum/Barrel

Centrifugal • Clear Liquid

Centrifugal • Self Priming • Stainless
 • Variable Speed • Submersible

Metering • Peristaltic
 • Microprocessor

Multi-Stage
 Magnetically Coupled

Progressing Cavity

SEALING DEVICES | LUBRICANTS & COATINGS | PROCESS CONTROLS

Industrial Coatings:
Erosion, Corrosion,
& Abrasion Protection

Bearing Isolators
• Shaft Grounding • Shaft Seals

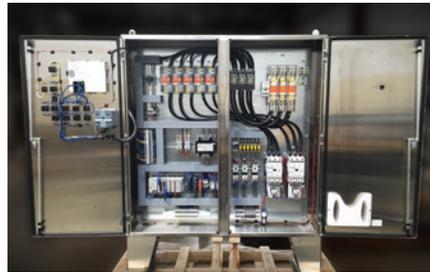

Concrete & Steel Coatings: FDA
Approved • Floor Patch Kits
• Secondary Containment

AUTOMATED ELECTRICAL AND MECHANICAL SOLUTIONS.

From the initial drawing to the final product, our in-house capabilities allow us to design, engineer, and manufacture your system while minimizing the need for outsourcing which maximizes our overall control of cost and time management.

We also manufacture custom electrical and pneumatic control panels. We have full engineering capabilities that include PLC, HMI, and SCADA programming.

ENGINEERED CONTROL PANEL

COMPLETE PUMP SKID

Mechanical Seals: Seal Plans
• Gas Seals • Split Single Seals
• Mixer Seals

I TOTAL SYSTEM SOLUTIONS

DATA: COLLECT, ANALYZE AND ACTION.

Capturing data is the way of the world now. Being able to effectively analyze the information and most importantly take action against it is what Estabrook is doing to partner with its clients.

Estabrook seeks to understand and solve our customers' needs. We analyze complex process conditions and convert them to our Total System Solutions utilizing pumps, valves, seals, service & repair, and controls.

As experts in fluid handling, we are uniquely positioned to capture performance data, analyze it, and then provide action to deliver your Total System Solution. Each part of this process is integral in producing a total system.

1

i-ALERT®2:

Continuous Vibration, Temperature and Run-Time Monitoring Bluetooth Sensor.

2

PulsarLube:

Automatic Microprocessor Controlled Dispensing System.

3

Inpro Bearing Isolator:

Permanent Bearing Protection.

4

Luneta:

Condition monitoring to Inspect Level, Color, Clarity, Condition & Wear Conditions of the Lubricant.

5

Mechanical Seals:

Cartridge Seals, Split Seals, Gas Seals, Mixer Seals and Seal Flush Plans.

6

Pump Protection (Suction):

Suction Strainer or Suction Diffuser functioning as a strainer.

7

ARC Industrial Coatings:

Efficiency and Protective Coatings.

8

Pump Protection (Discharge):

Discharge Check Valve or Tri-flow Control Check Valve preventing Water Hammer.

■ PENN YAN REPAIR FACILITY

WE DELIVER IT, SERVICE IT, AND STAND BEHIND IT.

Estabrook's 6,000 sq. foot Penn Yan, NY facility, located in Keuka Business Park, services our valued repair customers better than ever. This facility offers the machinery and expertise to service your rotating equipment like never before, regardless of manufacturer or model.

We have experience with most all manufacturers including but not limited to: Goulds, Ingersoll-Rand, Worthington, Flowserve, Byron Jackson, Hazelton, Flygt, KSB, Delaval, Fairbanks Morse, Union, Blackmer, Galigher, ASH, Morris, Peerless, Kinney, Nash, Busch, Roper, Deming, Allis Chalmers, Alfa Laval, Tranter, ITT, MDPneumatic, Lightnin, Philadelphia, Chemineer, Wilden, Warren Rupp, ARO, Viking, Warman, Aurora, Gorman-Rupp, Vanton, Gusher, Lawrence, Ahlstrom, Sulzer, Weir, Griswold and Roots.

We also have complete machining capabilities including both horizontal and vertical boring mills. We can also metallize and weld repair your components, manufacture obsolete parts or source them from the manufacturer to meet your critical delivery requirements. As a member of GDPWW, we benchmark with the best shops in the industry to provide cradle to grave service.
